

## The DB InnoTrans 2018 exhibition programme at a glance: from 18 to 21 September

At this year's InnoTrans, DB will be offering a diverse programme of interesting events and topics relating to digitalization and networked mobility in the **CityCube (Hall B, booth 406)** and **outdoors** (tracks O/608, O/600, 6/410, 10/400, 11/416 and O/415). The "**Mobility Talks**" **dialogue forums** will be taking place every day of the trade fair with conversations and panel discussions where visitors can get actively involved.

DB is also represented as an event partner in the **HackTrain Hackathon@innotrans**, which will run for the duration of the fair. Developers, designers and company founders from all around the world are invited to this **technology marathon**. International teams will seek to develop **new prototypes** of apps, software and websites relating to rail transport. **The first results of the hackathon** will be presented during the trade show.

A full-scale model of **DB Regio's** double-decker **Ideas Train** will be on show at a trade fair for the first time (**south entrance**).
